	Air Quality Division RESCISSION OF POLICY AND PROCEDURE		DEPARTMENT OF ENVIRONMENTAL QUALITY
Rescinded Date: January 29, 2014	Subject: Operational Memorandum No. 2		Category: <input type="checkbox"/> Internal/Administrative x External/Non-Interpretive <input type="checkbox"/> External/Interpretive
	Title: Changes at a Stationary Source after Renewable Operating Permit Issuance		
	Number: AQD-002	Page: 1 of 1	

Air Quality Division Operational Memorandum No. 2, Changes at a Stationary Source after Renewable Operating Permit Issuance, dated November 26, 2001, is rescinded. This Operational Memo describes the Renewable Operating Permit (ROP) rules on ROP facility changes that require notification of change, or an administrative amendment, a minor modification, or a significant modification to the ROP. Flow charts of the rule process for these scenarios are included. Op Memo No. 2 does not include any policy or internal/external procedure, but is instead an outreach tool to educate ROP facility owners on the ROP rules. Therefore, it does not qualify as a DEQ policy or procedure as it does not provide direction or interpretation beyond what is in the administrative rules. This Op Memo gives a layman's explanation of the concepts in the rules and has since been included in other outreach documents, such as *Life After ROP*.

DIVISION CHIEF APPROVAL:

G. Vinson Hellwig, Chief
Air Quality Division
